

María Paz Lagos Abalos

Digital interaction designer

Professional Summary

Digital interaction designer with a strong focus on backend development and UX/UI. My expertise lies in integrating Design Thinking, programming, and interface development to craft innovative and efficient digital solutions.

Deeply passionate about artificial intelligence and its transformative role in user experience, I continuously explore emerging technologies to enhance digital interactions. My proficiency in illustration further supports my prototyping abilities, enabling me to design compelling sketches and mockups that streamline the creative process.

With a resilient and proactive mindset, I thrive in dynamic environments that demand critical thinking, creativity, and leadership. My adaptability and collaborative nature allow me to excel in multicultural teams, driving impactful and user-centered design solutions.

Education

2022 - Now **Universidad Del Desarrollo**
Degree in Digital Interaction Design

2006-2021 **Colegio Sagrado Corazon de Apoquindo**
Primary and Secondary Education

Additional Experience

Teaching Assistant - HYFLEX Master's in Sustainable Design & Innovation (MADIS), UDD | 2024 - Now

Supporting the teaching of the Master's program in Sustainable Design & Innovation.

Teaching Assistant - Observation and Systemic Thinking, UDD | 2025 - Now

Assisting the professor and students in learning and applying observation and systemic analysis methodologies.

Support and Participation in the 23' DID UDD Fair | 2023

Collaborative development and execution of video mappings and visual content for the digital interaction design fair

"Innovators of the Future" Program - Stanford University | 2024

A leadership and innovation program designed to drive global impact projects, providing training in innovative methodologies and disruptive thinking within the Silicon Valley ecosystem.
